PROFESSIONAL SUMMARY

Full-Stack & Mobile Software Engineer with 3+ years of experience building cross-platform mobile apps, distributed web platforms, and AI-enabled software. Proficient in React Native, Next.js, and TypeScript, with a background spanning offline-first mobile architecture, multi-tenant cloud backends, and RAG pipelines. Proven track record of improving workflow efficiency by 40% through automated compliance systems and delivering high-performance applications used by thousands of students.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), Python, Java, HTML5, CSS3
- **Mobile & Frontend:** React Native, Expo, Next.js, React.js, Tailwind CSS, Tauri
- **Backend & Databases:** Node.js (Express), FastAPI, Supabase, Convex, Firebase, Upstash Redis, RESTful APIs
- **AI & Architecture:** Gemini API, RAG Pipelines, Vector Search, Offline-First Architecture, Real-Time Sync
- **DevOps & Tools:** Git, GitHub, Vercel, Netlify, VS Code, Agile/Scrum

WORK EXPERIENCE

Mobile & Full-Stack Developer | The Threadly Nest Aug 2026 – Present

- Developed a cross-platform mobile app for custom tailoring management with role-based access control, body measurement tracking, and real-time status updates.
- Built a cloud backend on Vercel utilizing Cloudflare R2 / AWS S3 presigned URLs for secure image storage and Google Gemini AI for automated customer consultations.
- Secured API endpoints using JWT authentication, Google OAuth 2.0, Zod schema validation, and rate-limiting middleware paired with Zustand global state management.

Full-Stack Developer (Contract) | NACOSS E-Voting System Jul 2026 – Aug 2026

- Engineered a passwordless, anonymous e-voting platform utilizing single-use OTP authentication, decoupled vote receipts for voter anonymity, and admin TOTP 2FA.
- Implemented an atomic, hash-chained vote transaction pipeline (prevHash → hash) backed by PostgreSQL Row-Level Security (RLS) to eliminate race conditions, prevent double-voting, and enable cryptographic vote chain auditing.
- Processed over 250 encrypted ballots during the departmental election with zero collisions or downtime.

Live Platform: https://nacossfuta.com.ng/

Lead Mobile & Full-Stack Engineer | Onà AI Jun 2026 – July 2026

- Architected a cross-platform Android mobile application using React Native and Expo, delivering personalized academic and career roadmaps to Nigerian secondary students.
- Implemented a serverless Next.js API layer integrated with Upstash Redis to manage stateful asynchronous chat interactions across mobile and WhatsApp endpoints.
- Engineered a RAG pipeline backed by Supabase Vector DB, grounding LLM outputs in verified national statistics and institutional datasets.
- Built adaptive 12-question assessment state machines with structured JSON-output parsing to render dynamic, native UI components.
- Integrated an offline-first caching layer that stores generated roadmaps locally and supports downloadable PDFs in low-connectivity areas.

Founder & Full-Stack Developer | AdexPOS Solutions Feb 2026 – Apr 2026

- Built a multi-tenant cloud point-of-sale platform featuring strict data isolation, role-based access control, and dynamic tenant configurations.
- Implemented real-time data synchronization using a Convex reactive backend, achieving sub-second updates across distributed POS clients with zero UI blocking.
- Engineered a dual-interface architecture combining an offline-capable Tauri desktop client with a centralized React administration portal.

Live Platform: https://adex-pos-one.vercel.app/

Frontend Developer (Internship) | Redeemer's University Data Protection Office Sep 2025 – Nov 2025

- Developed an enterprise compliance platform that digitized paper-based audit workflows and automated vendor regulatory reviews.
- Built reusable, validated multi-step React form interfaces, cutting administrative processing time by 40% while improving policy tracking accuracy.
- Integrated Supabase authentication and relational tables to enforce secure access controls and persist verifiable compliance audit trails.

LEADERSHIP & ACTIVITIES

National Director of Welfare and Membership Services | NACOS *2025 – 2026*

- Coordinated national student welfare programs and engagement initiatives across collegiate chapters, serving an active body of over 5,000 members.
- Led cross-functional student committees to streamline operational updates and institutional communication.

EDUCATION

Bachelor of Technology (B. Tech) in Computer Science

Federal University of Technology, Akure (FUTA)

Graduated: 2026
